Project Name	IoT Based Safety Gadget for Child Monitoring and Notification
Maximum Marks	4 Marks

IOT BASED SAFETY GADGET FOR CHILD MONITORING AND NOTIFICATION

Goals and Objectives

- To monitor child's safety, location and health

- Gathering information about children to ensure children's safety

PROBLEM STATEMENT

- **If a child leaves a geofenced area, an application installed on the device can trigger various actions, such as sending real-time notifications of the device's whereabouts, encrypting data on the device or disabling sensitive functions.**
